SWISS PHYSIOLOGY SUMMIT

PHYSIOLOGY AND IMAGING :
BETTER TOGETHER ?

09:00–09:05 Welcome — Stéphane Fournier (Lausanne, CH)

09:05–09:10 Programme overview & workshop presentation — Thabo Mahendiran (Lausanne, CH)

Guest Lecture:

09:10–09:30 A primer of coronary physiology — Bernard de Bruyne / Thabo Mahendiran (Aalst/Lausanne, BE, CH)

Session 1 – Physiology derived from CCTA

09:30–09:45 FFR-CT: Principles in a nutshell & literature — Georgios Tzimas (Lausanne, CH)

09:45–10:00 CCTA versus FFR-CT in patients with ACS — David Meier (Lausanne, CH)

10:00–10:30 How I use CCTA and FFR-CT in my clinical practice — Frédéric Bouisset (Toulouse, FR)

 10:30–11:00 COFFEE BREAK + HANDS ON (*thermodilution with wetmodel*)

Session 2 – Focus on the epicardial arteries

11:00–11:20 Choice between OCT or FFR in intermediate stenoses — Lorenz Räber (Bern, CH)

11:20–11:40 Survival guide through all epicardial coronary physiology indices — Thabo Mahendiran (Lausanne, CH)

11:40–11:55 Review on Angio-Derived FFR — Ioannis Skolidis (Fribourg, CH)

11:55–12:10 FFRangio: a new era after ALL-RISE — Stéphane Fournier (Lausanne, CH)

 12:10–13:15 LUNCH + HANDS ON (*thermodilution with wetmodel*)

13:15–14:00 Live Case (OCT / FFR / FFRangio) — Lorenz Räber, Thabo Mahendiran, Stéphane Fournier

Session 3 – Focus on the microcirculation

14:00–14:20 Can we assess non-invasively the microcirculation? — Christoph Ryfoll (Bern, CH)

14:20–14:40 Bolus or continuous thermodilution? — Thabo Mahendiran (Lausanne, CH)

14:40–15:00 CSR : Data Review and explanation of the hypothetical MOA's — Ranil Da Silva (London, GB)

 15:00–15:30 COFFEE BREAK + HANDS ON (*thermodilution with wetmodel*)

15:30–16:00 State-of-the-art microcirculation assessment - Live Case — Stéphane Fournier & Thabo Mahendiran

16:00 Workshops: HANDS ON (*thermodilution with wetmodel*)
