

LAUSANNE SWITZERLAND 30 - 31 MARCH 2023

This two days Conference will provide an opportunity for EORTC members to highlight their accomplishments, identify gaps, and generate new ideas for implementing future practice-changing clinical trials in gynecological cancers.

Three outstanding keynote speakers will discuss the challenges and opportunities for immunotherapy and PARP inhibitors in gynecological cancers:

- **Prof. José Conejo Garcia, Duke University, USA:** “Novel interventions to render CAR T cells finally effective against gynecologic tumors”.
- **Prof. George Coukos, Lausanne University Hospital, CH:** “Mobilizing immunity against HGSOE (and why it has not worked so far)”.
- **Prof. Inthidar Labidi-Galy, University of Geneva, CH:** “Association of location of BRCA1 and BRCA2 mutations with benefit from olaparib and bevacizumab maintenance in high-grade ovarian cancer: phase III PAOLA-1/ENGOT-ov25 trial subgroup exploratory analysis”.

More information and free registration are available at events@eortc.org
