

FOODY PLAY STUDY

How does your brain react
to food during pregnancy?

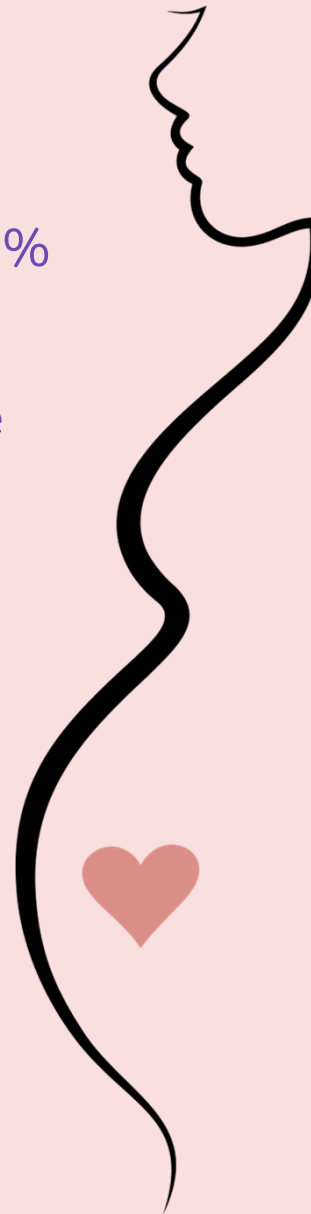

Physical and psychological changes during pregnancy are not fully understood.

Join our study, where we will explore the effects of food on your brain.

Did You Know?

Around 80%
of women
experience
food
cravings
during
pregnancy

What is the purpose of this study?

To investigate how the brain responds to food viewing in women in their second and third trimester in pregnancy and their relationship to metabolic health.

What are the benefits of participating in this study?

There is no direct benefit.
You will receive information about your metabolic health and your brain's food preference!

Do I get paid?

You will receive a remuneration after each visit made! You will receive 120 CHF for **Visit 1** and 200 CHF for **Visit 2**.

What does my participation involve?

1 to 3 day(s) before visits

Phone interviews

General medical information
10-30 minutes

Online Questionnaires

20-40 minutes

Visit 1

Between 12-16 weeks of pregnancy
2h 30 minutes

Neuria App

Play app each day for 9 days
after the visit
20 minutes per use

Visit 2

Between 32-36 weeks of pregnancy
2h 30 minutes

Neuria App

Play app each day for 9 days
after the visit
20 minutes per use

What's included during the visits?

✓ Short questionnaires

✓ Electroencephalogram (EEG) to measure the activity of the brain

✓ Medical exams to measure different body characteristics (body composition, heart rate, level of sugar...)

✓ A snack

Are there any risks if I participate?

There are no risks involved in participating in this study. The methods used are non-invasive and pose no risk to your health or your baby.

Is the data confidential?

All data protection rules are respected. Your name will never appear on the internet or in a publication. Your data is encrypted to prevent your identification.

Do I have the right to withdraw from the study?

You can withdraw from the study at any time if you want to.
