

2023 Joint ULB-UNIL summer courses in cancer biology: part II

Monday 28th August to Friday 1st September 2023

CHUV – Lausanne

	Monday 28 th August	Tuesday 29 th August	Wednesday 30 th August	Thursday 31 st August	Friday 1 st September
9h15-10h00	9h45 Welcome Jean Yannis Perentes Etienne Meylan	Antigen agnostic dendritic cell therapy Michele De Palma	Colorectal cancer subtypes and management Tatiana Petrova	<u>Via WEBEX</u> Glioblastoma management where are we? Monika Hegi	Melanoma Olivier Michielin
10h15-11h00	Neutrophils and role in immunogenic tumor response Etienne Meylan	Identification of neoantigens Michal Bassani Sternberg	Surgery: still possible in situations of metastasis? Thoracic Surgery Michel Gonzalez	Immunogenic considerations in Brain Metastasis Johanna Joyce	Conclusion Jean Yannis Perentes
11h15-12h00	Hallmarks of Cancer Douglas Hanahan	Novel adaptive immune approaches in solid tumors George Coukos		CAR T cells in the management of glioblastoma Denis Migliorini	Free networking Free time to visit Lausanne and departure Saturday morning.
12h00-13h00	Break	Break	Break	Break	
13h15-14h00	Surgical approaches to boost the immune system: from bench to bedside Jean Yannis Perentes	Biomarker development and precision medicine Kristzian Homicsko	Poster session short presentations by PhD students (2') Free exhibition and meeting with the scientific community <u>Auditoire Paternot</u>	Non invasive imaging of cancer Margret Schottelius Niklaus Schaefer	
14h15-15h00	NSCLC and pathology: advances in the molecular characterization of this disease Sabina Berezowska	Impact of biomarkers in the management of NSCLC Solange Peters		Leukemia Freddy Radtke	
15h15-16h00	Real time imaging of the immune response: particularity of dendritic cells Mikael Pittet			Lymphoma Elisa Orricchio Justine Epiney	
16h15-17h00				Perspective in innovative therapies in melanoma Jan Haanen
