

EDISC is EPIC:

- Evidence-based
- Patient-centred
- Interprofessional
- Collaborative

New education initiative:

The EUROSPINE Diploma in Interprofessional Spine Care (EDISC)

EDISC is aimed at developing expertise and empowering spine care professionals of all specialties.

Why a EUROSPINE Diploma in Interprofessional Spine Care (EDISC)

- EUROSPINE is committed to harmonise spine care based on evidence. This will lead to better outcomes for patients throughout Europe and beyond.
- EUROSPINE is the first professional society to recommend inter-collaborative evidence-based treatment to make you more successful as a clinician.
- EDISC will make you more competitive as a spine care clinician.
- EUROSPINE is dedicated to the best spine care in Europe and beyond
- Graduating from EDISC will help you gain authority within the spine care community
- EDISC will lead to Spine Centres of Excellence in non-surgical spine care

This patient-centred education activity developed by an interprofessional team of experts with guidance from medical education specialists promotes patient-centred and collaborative care using evidence-based best practice to improve patient outcomes.

Target Audience

Healthcare professionals in Europe in order of availability and access: primary care physicians, physiotherapists, chiropractors, osteopaths, naprapaths and others who are graduated as clinicians from a recognised institution (i.e. professional school or university).

At least two years of clinical experience is recommended but new graduates are encouraged and welcome to register.

Obtain the EUROSPINE Diploma in Interprofessional Spine Care (EDISC)

In order to obtain the EUROSPINE Diploma in Interprofessional Spine Care, practitioners must complete all 7 EDISC modules.
